Rithvik086

Education

Indian Institute of Information Technology, Sri City

Aug. 2023 – May 2027

B.Tech in Computer Science and Engineering

CGPA: 8.90 / 10

Relevant Coursework

- Data Structures
- Database Management
- Web Technologies
- Cloud Computing
- Operating Systems
- HPC
- OOPS
- Algorithm Analysis
- Computer Networks
- Computer Architecture

Experience

Full Stack Engineer Intern

October 2025 – January 2026

Soundverse AI

Remote

- Built and optimized scalable web applications using **React.js**, improving performance, responsiveness, and accessibility across devices for an early-stage product serving **100K+ active users**.
- Collaborated closely with backend engineers to integrate and deploy **AI-powered tools and APIs**, strengthening cross-team collaboration and accelerating feature delivery.
- Identified and resolved a large volume of frontend and integration issues, significantly improving application stability, UX consistency, and reducing user-reported bugs across core flows.
- Redesigned the **user cancellation flow** and implemented/debugged **Stripe-based payment logic**, resulting in a **significant reduction in user churn** and improved payment reliability in a high-growth startup environment.

Projects

Replix | React, Node.js, Express, TypeScript, REST APIs, WhatsApp Web.js, AWS

September 2025

- Built a full-stack WhatsApp automation platform using Web APIs, QR-based auth, and real-time messaging with Socket.io, achieving better delivery reliability.
- Implemented LLM-powered auto-replies with configurable rules, logging, and analytics via a React + TailwindCSS dashboard, reducing manual setup time significantly.
- Deployed the system on AWS and Vercel to ensure seamless updates and continuous uptime.

ArtisanSpace | MongoDB, Express, TypeScript, Node.js, React, GitHub

August 2025

- Built a full-stack e-commerce platform for handicraft artisans to boost product discovery and customer engagement.
- Implemented OTP-based authentication and role-based access (Admin, Customer, Artisan, Manager), along with inventory, cart, analytics, and workshop booking modules, reducing manual effort.
- Designed a custom-order system with automated data cleanup and maintained structured team collaboration on GitHub.

UniVerse | Kotlin, Firebase, Jetpack, ConfigCat

September 2024

- Developing a centralized Android app to organize IIITS academic resources (notes, PYQs, reference books), resolving scattered file access across multiple locations.
- Implemented Firebase for real-time storage and updates, significantly accelerating data retrieval times.
- Leveraged Jetpack libraries (LiveData, ViewModel, Navigation) to build a scalable architecture and ensure a smooth user experience across devices.
- Added feature flag controls to remotely toggle app features and enable maintenance mode, minimizing downtime during updates.

Technical Skills

Languages: Java, JavaScript, TypeScript, C++, SQL

Developer technologies: React, Node.js, Express.js, HTML, Prisma, Next.js

Developer Tools / Cloud: VS Code, Git, Android Studio

Database & Backend: MongoDB, MySQL

Soft Skills: Teamwork, Problem Solving, Communication, Time Management
